

Import respondent answers - UploadFileImport

- "import answers at survey"

Way to upload answers data that was collected offline and in other system.

Input

End point URL: <https://app.defgo.com/defgo/UploadFileImport>

Request method: POST

Enctype: multipart/form-data

Parameters:

- "surveyId": <survey id, int> ,
- "delimiter": < delimiter, string> ,
- "containHeaders": <'true' or 'false', string > ,
- "surveyAnswers": <survey answers, string > ,
- "file": < file with answers, file> ,
- "qId": <questionnaire id, int> ,
- "showOnJsp": < string> ,
- "cParameter": < security parameter , string>

Explanation of the parameters:

surveyId	Id of survey to which answers are imported.
delimiter	Delimiter which is used in file with answers.
containHeader s	Whether answers data (submitted as file or as text) contains header. Header is the first line of file containing type of data listed in subsequent lines (for example "Session ID;User ID;Group ID;Period;Date;..." with delimiter as semicolon). Export of answers made in Defgo system always contains headers. It is always assumed that data values in each row are listed in the same order as in export made in Defgo system. If this parameter is "true", then first line is skipped and answers are read from the second line.
surveyAnswer s	Text containing answers in Defgo format.Each line contains data for one answer. It is assumed that data values in each line are listed in the same order as in export made in Defgo system. Text should be coded in UTF-8.
file	File containing answers in Defgo format. There are several formats: <ul style="list-style-type: none">• ASCII separated - One can obtain example of file in this format by making exports of answers in format "ASCII, common separated (delimited)" with the following settings: Export rows in formulars: Horizontal (as rows) Include first two columns from panel: false (unchecked) Write answer status and include unanswered for panels: false (unchecked) Write variable names to export file: false (unchecked) Any delimiter can be choosed.• PDF - PDF file generated by Defgo from survey implemented via method "Offline survey as PDF" and filled with answers

	<ul style="list-style-type: none"> • SPSS - SPSS file with answers. One can obtain example of file this format by making exports of answers in format "SPSS". <p>Maximum file size is 30Mb.</p> <p>Supported file formats:</p> <p>.sav - considered as SPSS format</p> <p>.pdf - considered as PDF format</p> <p>Files with other extensions are considered as ASCII-separated format.</p>
qId	Questionnaire id of survey to which answers are imported.
showOnJsp	<p>If this parameter is present, answers are validated and imported to survey if validation succeed.</p> <p>If this parameter is absent, answers are only validated (and validation error or number of answers is returned in response).</p>
cParameter	<p>Security parameter of survey.</p> <p>It is used in survey link which is sent to respondent (named as "c")</p> <p>Example of survey link:</p> <p>https://www.defgo.net/s.asp?id=1439943&c=ZDJENNZ&s=1&l=eng&server=localhost</p> <p>Here c is a security parameter with value ZDJENNZ</p> <p>It is necessary to send this parameter if showOnJsp parameter is sent.</p>

Result / output

Data will be added in survey.
